From: Stephen Norris / Vice President – BTI Services, Inc.

Re: Use of Oxifree Product

BTI Service, Inc. has used the Oxifree product to coat wellhead components and complete wellheads as well as structural offshore platform components. The product and its application have been very well received by the customers that we have done the work for and we have interest now in both domestic US and International market areas.

I strongly recommend the product and support its use and benefits.

Sincerely

Stephen Norris
